### **Election/restriction**

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-13, drawn to a product of a lighting fixture, classified in Class 313, subclass 487.
- II. Claim 14-26, drawn to a method of manufacturing lighting fixture, classified in Class 252, subclass 301.16.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case, the product of lighting fixture can be made by another and materially different process such as by air drying blue or white phosphor or by sintering blue or white phosphor.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, because of their recognized divergent subject matter, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. E. Tracy on 6-6-05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2879

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
